

SENIOR CENTER INNOVATIONS

Digital Confidence Building Computer Series

Email, Microsoft Office, and Facebook, oh my! Do you ever feel overwhelmed or frustrated by computers? Then this is the class for you! Join us for this three week course and learn how to send an email, maneuver social media, online shop, and much more. We will answer your individual questions and give you a live demo to build your "digital confidence" and set you up for success. Please bring something to take notes with to take the information home with you.

TECHNOLOGY CLASS

PROJECT SUMMARY

Many senior centers are proposing technology labs. These labs use a variety of methods with one common goal, to help seniors stay connected and be comfortable with using technology.

One additional benefit of the technology labs is that they offer a place for seniors to apply for benefits such as SNAP.

HIGHLIGHTS

Find out what technology is most relevant to seniors. You may not need a full computer lab, but a tutor to show how to take selfies and post on Facebook! Or perhaps tablet computers are easier to use and offer assistive technology apps that can help in other areas.

PARTNERS

- Community Colleges

Senior Center Innovation Grants were supported by:

Department of Human Services
Division of Aging Services

Our seniors LOVE playing games on the tablets. They play a lot of memory games which is very helpful for them.

CHALLENGES

Make sure to purchase quality equipment with the help of tech savvy staff or volunteers. Nothing is more frustrating than the WiFi going out while teaching a class.
